PROFESSIONAL SUMMARY

Motivated and adaptable Computer Science student at Bina Nusantara University (BINUS) with a strong passion for building impactful solutions and continuous learning. Proven ability to take ownership of responsibilities, collaborate effectively in team environments, and deliver results under competitive pressure. Active Laboratory Assistant with experience mentoring peers and an award-winning track record in hackathon competitions.

EDUCATION

Bina Nusantara University (BINUS) 2024 – Present
Bachelor of Computer Science — Jakarta, Indonesia

TECHNICAL SKILLS

Languages: Kotlin, TypeScript, JavaScript (Node.js), Go, C#, SQL
Frameworks: Vue.js, SvelteKit, Tauri 2, gRPC
Backend / DB: PostgreSQL, Redis, MongoDB, RabbitMQ, MinIO, Firebase Realtime Database
DevOps / Cloud: Docker, Traefik, Google Cloud Platform (GCP), Firebase Cloud Messaging
Tools: Git, Unity 3D, Photon PUN, Groq AI API (Llama 3.3), Android Studio
Architecture: Microservices, MVVM, Repository, Observer, Command, State/Event, Singleton

LANGUAGES

Indonesian (Native) **English** (Conversational)

WORK EXPERIENCE

Laboratory Assistant (Aslab) 2025 – Present
Bina Nusantara University (BINUS) — Jakarta, Indonesia

- Supervised and mentored students across multi-domain programming assignments covering web, mobile, desktop, and systems topics
- Provided technical guidance on software architecture, design patterns, and code quality standards
- Led technical development as Tech Lead for Hwixel — a 4-member Android group project management app built with Kotlin, Firebase, and Groq AI

SELECTED PROJECTS

ArcaneRing — Multiplayer RPG with Unity 3D & Photon PUN; state-machine AI for 4 enemy types (C#)
RUSA Desktop — Cross-platform desktop app — Tauri 2 + SvelteKit, 20+ user roles, 5 design patterns
HoshiBmatchi — Full-stack microservices web app — Vue.js + Go + gRPC, Docker, RabbitMQ, Redis, Traefik
Hwixel — Android group project tracker — Kotlin, MVVM, Firebase, Groq AI; 14 screens, 4-member team

EXTRACURRICULAR EXPERIENCE

Gunadarma Competitive Week (GCW) 2026 — Hacker | Top 10 Finalist March 2026
Hackathon Competition

- Served as primary developer (Hacker role) in a 4-member team; built WarungAI — a WhatsApp-based AI conversational POS & CRM system for small businesses
- Developed full backend with Node.js and MongoDB; integrated Google Cloud Platform for AI-driven order processing

AWARDS & COMPETITIONS

- Juara Favorit (Favorite Award) — Hackathon elevAlte 2025, BINUS x Microsoft: recognized as audience and judges' favorite team
- Top 10 Finalist — Gunadarma Competitive Week (GCW) 2026: placed in the top 10 teams among all participants in the university-level hackathon competition
